To whom it may concern

I was born on 14. Oct. 1952 as the first son of a catholic family in W-Germany. My parents had to work hard to get me and my 3 sisters through life and to give us a good education. So it was no wonder that the mainpoint in my education was laid on economical things. "How can I have it better than they". So I went 13 years to school and get an highschool examination. After that I learnt two professions, one as a pharmacist and carpenter. Then I start studying economic. But still I was missing something. At that time I haven't known what it was. So I had a look into other professions, but all these was not satisfying me. I hadn't the the feeling that this way of

living would grace me or the world.

So in 1973 I started my first journey to India, cause the Orient had something mystic for me and I tried to find it. I met the first Sannyassin 1973 in the desert of Pakistan and they told me from Bhagwan. I decided to visit him in Bombay, but for some family reasons I had to go back to Germany without seeing him.

Here I married and we get two children. I started a career as a businessmanager. Our family had a nice time and all looked well from the outside - with an own house a good job, two beautiful children and all what makes life secure. But still my wife and me were missing something. What it was we didn't know. So I give up my job and we were going on the countryside and started an alternative living in communes in Germany. We had the hope that natural live would bring us closer to that point we were missing. In 1978 we met again sannyassin and get again

contact to Bhagwan. So we decided to leave Germany and to go to Poona to visit him.

After seeing Bhagwan a really chance has come into my life. It is really difficult to describe what happened with me. (If it would so, someone had for sure told it to me before) He remembered me, just by being in his present on something essential what I had forgotten. What I was looking for my whole life. A heart to heart connection without words happened. The first time in my life I really were living for myself - for my innergrowth - not only for the outside. He brings me God nearer. Trying to dance things only at the outside that I had done for years. But what Bhagwan was telling me was totally different and simpel. He teached me to love myself! And in that moment I loved myself it was very easy to love others. There was no need more for me to dance people or the world. And that makes me free. I wish it to everyone. I'am a sanniyassin now sind $4\frac{1}{2}$ years

and for me it is absolutely clear that Bhagwan is a master like Jesus, Mohamed, Moses, Buddha, Gao Tau..... and it is a big chance for all human beings to be with him. Just by his presence in Rajneeshpuram, Oregon, he makes America richer.

America means freedom. So please give Bhagwan the right to stay. In Rajneeshpuram so many loving and beautiful things are happening - let it be and grow!

loving greetings
