BHAGWAN SHREE RAJNEESH

TO WHOM IT MAY CONCERN :

After a period of seventeen years devoted to study, at some of the more renowned educational establishments in England, including Shrewsbury School and Lanchester Polytechnic, I started travelling.

Mostly my work involved marine engineering projects but sometimes land based engineering, in all parts of the world. In the work there was contact with many highly skilled and knowledgeable people with great experience of life.

In early 1978, word of Bhagwan Shree Rajneesh reached me whilst in Pakistan; during the subsequent year, I read his books and talked with some of the people who had met him. In the year following, I finished a contract in Mombassa, Kenya, and flew to India to see Bhagwan.

During the years since I first met him, while he gave discourse and especially since he went into silence, my life has blossomed. So many of the problems that seemed to limit my life have dropped away. Although I cannot speak for others, it is my observation that everyone who comes into contact with Bhagwan is blessed.

That Bhagwan is a man of exceptional ability is beyond question. There is no-one in my whole experience as this Man.

With all good wishes,

Sincerely,

Nicholas M. Parkyn BSc
