

To whom it may concern

Living in the Dutch Buddhafield "De Stad Rajneesh" with Bhagwan as my lover and guidance I become more and more aware of what it is to be alive and to enjoy and celebrate every moment, something is happening in Bhagwan's Buddhafield and it is impossible to ~~be~~ explain it with my head, it is not a head-thing but it goes through my heart, when I am totally silent and able to be in touch with my master. there is love, so much love as I never experienced before in my life. It has nothing to do with logic, thinking, reason or whatever and without living in Bhagwan's Buddhafield I never would have been able to come in touch with something in myself which is the most "alive".

In "De Stad Rajneesh" about 70 sannyasins are joining the experiment of this Buddhafield and what else to say then: come and stay with us for a while to get the "touch". For me there is no place else, except Rajneesh-puram, ~~where~~ with the physical presence of Bhagwan. Now Bhagwan Shree Rajneesh is the greatest gift existence gave to humanity - I am only able to see a very little part of what he really is, and it is still

growing and plowing my mind.

Is there anything
else in the world
more important
than love?
