

ANNETTE SINGH
ADALBERTSTR. 94
1000 BERLIN - 36
WEST - GERMANY

24. July 1983

To whom it may concern:

I experienced Bhagwan Shree Rajneesh this year again at the 2. annual World Celebration in Rajneeshpuram - and for me, as a 38 year old social worker from Germany, it's again so obvious and visible, that his IDEAS and Insights about the Human mind and psychology could influence the Western Society to function in a tolerant and real social way.

I was studying social sciences from 1972-76 at the University of Bremen / West Germany and finished there July 1976 as a "graduierte Sozialarbeiter". Afterwards I mainly worked with sick, poor and in each way underprivileged people, where we're really trying to help them out with different methods like: street workers, alternative projects for very young mothers, but we always felt the limits for this engagement,

EXHIBIT "A-2327"

cause they really didn't want to change so much.

When I met Bhagwan at 1979, I went through a lot of inner changes to understand my self, to enjoy myself and others and be more accepting to every thing. So this really influences my way of looking at social ~~worker~~ problems and at the first time I was able to give people a sense of accepting themselves and others instead of fighting each other.

So, what I experienced in the Commune of Rajneeshpuram is the way of working together in an intense and relaxed way, the way of taking total responsibility about every thing I'm doing, the way of living together joyfully with many different people from very different social backgrounds.

And all this (and more) is only possible because of the physical presence of Bhagwan. The Commune is the expression of Bhagwan's vision of a totally new Humanity, living together in harmony with each other. The Commune is living from his ~~present~~ presence.

wish you the best
Annette Singh
