

TO WHOM IT MAY CONCERN

I was born in Belgium on the 23th of January 1949. I have studied gymnastics and later on became a teacher at the high school in Brussels. I have also been at the University of Amsterdam to become a dance teacher.

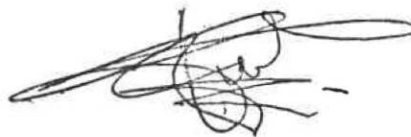

After a certain period in my life I was looking for a deeper understanding of my life and the world. I started reading books and went around to look for more mystical experiences. In 1979 I heard for the first time about an Enlightened Master in India, called Bhagwan Shree Rajneesh. I went immediately to India to taste his vision and to experience his teachings. I immediately felt that Bhagwan Shree Rajneesh was a very special person. So after three months I took sannyas and became a disciple of Bhagwan Shree Rajneesh. I went back to Belgium to work in a Catholic school where I was able to show my deeper understanding of the world and his mystery.

For me Bhagwan Shree Rajneesh is an exceptional person because of his special teaching. Even now, being in total silence I feel he is teaching even more than before.

It would be nice if Bhagwan Shree Rajneesh could stay in the United States and that his teaching could go on without legal troubles.

In the hope that the Authorities of the United States will understand his message and his exceptional teaching, I'd like to thank all the authorities to make his permanent staying in the United States possible.

Yours Faithfully

Pieters Hendrik
