

To whom it may concern.

I'm a swedish artist who sings and write my own music. Through many years I've been touring with my own rockgroup aswell as by myself, singing and playing akustic gitar. I've recorded seven albums of my own and also backing up a lot of other artists. I've been guesting TV-shows, writing radioprograms, given interviews etc. I'm touring all over Scandinavia and I want to see my music as some kind of musical pictures.

I've always tried to work on how to develop the way to express myself and my songs and Baghwan has inspired me in my work. I've listen a lot to his tapes and red some of his books and I find his work very positive and inspierring. It also gives my fantasy a challenge and sometimes it has helped me to finish my own work and projects.

I know that Baghwan's renown as a religious teacher and spiritual leader is very wellrespected all over the world. And I think a person with such exeptional abilities is of great importance to a lot of creative persons.

With kind regards
