Bremen (FR), 18.July1983

To whom it may concern

I am Diplom-Psychologist. And my occupation is drug-prevention in schools in Bremen (federal state of GFR). I am member of "Deutsche Gesellschaft für Verhaltenstherapie e.V." (DGVT), a german company for behavioral therapy and the greatest german therapist-company; vice-president of "Verein zur Förderung der Verhaltenstherapie im Raum Weser/Ems e.V.", a company of behavioral therapists, a regional part of DGVT; member of "Bildungs- und Begegnungsstätte für gewaltfreie Aktion e.V.", an institute for research and teaching the possibilities and methods of forceless activities; member of the political party "Die Grünen".

The traditional psychology views people and the reality like a machine: if the scientist knows all the factors of humans, of the life, of the reality he can describe and explain the whole (Turning Point, by F. CAPRA). But this viewing is limited: it seems to be impossible to know all the factors, because humans, life, the reality are very complex systems with higher and lower systems. And all the factors change in living systems permanently in the relation to the others.

BHAGWAN SHREE RAJNEESH shows the whole, He shows methods of finding the whole, of explaining and experiencing the whole. He is really a person of exceptional ability in science. I heard and saw some tapes and video-tapes from BHAGWAN and read some books, for example "Esoteric Psychology" and other. He shows the way to oneself and to growing oneself. And this is the best drugprevention. EXHIBIT "A-1166"

My occupation is teaching life, which prevents consumption of
and dying with drugs. And BHAGWAN gives His view of life
fortunately celebrating in this reality without abuse of drugs.
He is really a religious Teacher and a spiritual leader.
He gives answer to many psychological questions.
