July 16, 1983

To whom it may concern,  
with this letter I want to express  
that the religious leader Bhagwan  
Shree Rajneesh influences and supports  
my whole life. He gave it a totally  
new, very beautiful direction showing  
me the experience of love and  
religion.

I am a master of biology and  
chemistry. After two years of research  
on the Galapagos Islands, Ecuador,  
I obtained the graduation to  
teach these two subjects. Now I am  
training chemistry graduates from  
Poland and Rumania to transform  
their knowledge into German language.

Wearing Bhagwan's Mala and  
red clothing during my job is a  
great experience showing everybody

that being a scientist does not oppose to being a disciple of him. On the contrary - this enriches my work and helps not to be just a specialist, but to be total.

Bhagwan Shree Rajneesh helped me to find self-confidence through joy and silence.

I want him to stay in Oregon, USA, where he creates an oasis in the desert and where I can visit him frequently.

Sincerely

Pramada Alsowes
