To whom it may concern,

I got a diploma as a beautician and studied ballet, modern and folklore dance for 5 years and received a degree from the University of Munich (West - Germany) as a ballet dancer and was also educated as a ballet teacher.

I danced on theatre stages in southern Germany and France, also did work on television and in movies.

My religious interest was always very strong and by looking around in that area I came to know Bhagwan's books and lectures, which touched me very much and I wanted to go and see this man.

I met Bhagwan the first time in 1976 and took Sannyas right away. Bhagwan is the most exceptional man I ever met in my life. He shows me where man can go, where his abilities are and helps me living rightly just by his presence, through the possibility

of looking at him and feeling his love, his total harmony in himself and with everything around him.

My whole approach towards dancing changed totally through Bhagwan and in such a beautiful dimension, which I would never have imagined. First his words about dancing gave me a new perspective and now after years of moving out of a tight structure I feel the richness and unlimitedness I found through it. Through this also my teaching approach changed totally and found a new creative and spontaneous way.

This commune for me is the most loving and caring place I ever lived in, with many extraordinary people. And to have Bhagwan present here, to feel his love and silence during the Festivals or just seeing him driving by gives us to see and feel the space where we all meet with each other.

Sincerely yours

Ma Anand Gayan
