

Dear Sir

July 15, 1985

I became a disciple of Bhagwan Shree Rajneesh about 4 years ago.

Bhagwan's meditation techniques and therapy groups under His guidance really help our spiritual growth.

By getting into the inside of our selves and within our inside, we are lead to the truth very naturally. It's the real experience which happens inside. How much His silent presence makes it easier to happen! Just like chemical transformation happens quickly in high temperature, His energy help our transformation.

After becoming His disciple, I feel that I can't relaxed in myself and enjoy my life. Also I saw many people have grown very beautifully very quickly under the guidance of Bhagwan.

Visiting Rajneeshpuram I can see the difference between the work here and other place. In here nobody push other people, nobody push them. That's why people can be relaxed in the work and not be spoiled spiritually. I would like let it known to other people as possible.
