

TO WHOM IT MAY CONCERN :

July 29th, 1983

Since my first meeting with Bhagwan Shree Rajneesh, my life got a 180° turn. Listening to his words, his teachings in the Ashram in Poona, India, being part of that joyfull and meditative experiment, I discovered a lot of my lost potentials, abilities, attitudes, which are coming from the heart, from somewhere within my being, rather than the 'misused' mind - which created a lot of misery and pain in my life before becoming a disciple of Bhagwan. Meditating, going inwards, while using the meditation techniques devised by Bhagwan, trying to find that subtle balance, silent harmony inside of me and outside, this noiseless process is reflected in the deep silent comunion with Bhagwan, in our religious rituals and ceremonies like Satsang. During the Second Annual World Celebration this year in Rajneeshpuram, Oregon, I experienced that incredible silence - 15000 people sitting together with Bhagwan in such a profound, peaceful harmony!

At the moment living in a sannyas commune in Italy, trying to transform work into worship (as we experience work), to create a space for growth and meditation, where Bhagwan's loving presence can be felt, I feel very grateful for this opportunity, this very precious life, and my thankfulness goes to my Master, Bhagwan Shree Rajneesh:
